Latest News**

Silverstone; The (blood) pressure mounts...

The really good news is that 28 of you tell us that you will be at the Finals meeting. Looked at another way we have nearly 20 entries and are suffering high blood pressure from anxiety watching and waiting for more of you to enter.....

We know you are playing this cool.....

But.....

High Blood Pressure is an unattractive condition and we would urge you, please, put your entries in soonest. As you know the entry fee deal with the club means that we need 24

entries. Otherwise, we will hand over up to £2,000 of your drivers' bank funds to pay for the £100 entry fee cut.

With fingers crossed the weekend is coming in to shape. At the end of **Saturday**, we have organised a lavish street food supper served in our garages. Bring your chairs and booze and let's talk about next season. When you are settled, we will present the trophies for Saturday's race.

Then on **Sunday** we will present awards from 1700 in the BRDC clubhouse. For those who imbibe there will be sparkling wine. We are honoured that Stuart Pringle, the Managing Director of Silverstone Circuit has agreed to present the awards.

First Stuart will present race trophies for the Sunday.

Second, we will conduct a series of free draws. Four lucky people will get a £200 voucher for tyres. One lucky person will collect a sparkly new set of Les Weller wheels worth £500. AND. Josh Barnett will pull a name from the hat to win an engine rebuild valued at over £3,000. £4,300 worth of prizes to set you up for next year.

Then Stuart will present annual trophies to our chart-topping drivers including the overall champion and over 50 champion. To glamourise your photos care of Ben Tilley, it will be like the good old days with the champions awarded with laurel wreaths. Our plan is to have the huge Merlyn Trophy on hand. This goes to the winningest Merlyn driver who normally comes from our ranks.

We hope all of this will be an excellent way to end the season.

Les Weller wheels

How old are the wheels on your car? Thinking of replacements over the winter?

If you decide on replacements then Les can help. Today he can supply you with wheels that are **more accurate than the originals**. Here is what he says;

"Why not have the perfect wheel if it's the same price? Les Weller, is out of retirement and producing super accurate FF1600 Wheels. The adage hand built with care is all very well but as we have come to know, the quality and accuracy of a modern car is achieved with superior tooling and super accurate CNC processes it is exactly the same with Les's new wheels. In former times, Les relied on metal spinning techniques to form wheel rims, a process which served well over the years, and many rims have been formed in this way until now! His new rims are formed on the same type of machinery as used to produce high volume passenger car wheels with a final and superior expanding operation resulting in a perfectly round and perfectly on-size part, a wheel rim that cannot be bettered.

Production of Les's new super accurate wheel centres utilise high tonnage coining followed by CNC Machining of the PCD, the Conical Nut Seatings, and the Centre Hole resulting in Total Concentricity of these important surfaces. Walk around the paddock, take a look at old style nut seatings and compare with wheels-by-lesweller, no comparison, one does the job better than the other – accuracy is the winner. Assembling perfect wheel rims to perfect wheel centres results in the most accurate and true running FF1600 wheels the market has ever seen.”
